

Thank you ASGBI for the opportunity you gave me and accorded me a scholarship to attend the conference in Liverpool 2010.

It was a good learning curve for me. There is a big difference especially in the technology used in the treatment of the patients over there, the readily availability of the drugs and the medical facilities to the ill people.

I gained a vast amount of knowledge that I believe I will put to use over here in Uganda. Please continue this scholarship for other people in the future, it's very useful , helpful and gives exposure for some to realize and pursue their future dreams. Thanks a lot.

Yours

Ruth Nsamba Barongo
